

Mars Preview:

Overall: The Fighting Planets went 6-5 on the year. This is a good record for a team that was on the younger side of the spectrum. This is a stepping-stone year for them as they will retain some key players.

Offensive Overview: This offense was young last year as only in his sophomore year he threw for over 1,300 total yards and 13 touchdowns. There were some growing pains as he did throw 11 total picks. Their running game was stellar as their top tailback now senior Evan Wright ran for 1,333 on the season. The team averaged 31 points a game this year which lets off pressure on the defensive.

10/21	Vs Hampton	49-42 L
10/28	@ North Catholic	21-14 W
11/04	@ McKeesport	43-0 L

Defensive Overview: The defense had a roller coaster year. They had some games where you can't score on them to games where they let in 55 total points.

Overall: This Mars team is in a prime spot to have a strong year. They retained their strong quarterback who can rack up the yards. They need him to make smarter decisions and give the ball up so much. They also retain their running back who is in his senior campaign and has the talent to go for another 1,000-yard season. They also need to keep that defense-focused once they are locked in no one can score.
