

### New Castle "Red Hurricanes"

#### Last Year schedule

**Last year's overview:** The Red Hurricanes had a Disappointing year after going 6-6 in 2021 with a playoff appearance. To have one win that wasn't even in their section. They went 0-7 in conference play and 1-9 overall.

**Offensive Overview:** The Red Hurricanes offensive was a mess last year as they struggled to put up points. Only two games at or above 14 total points. They had only one wide receiver that seemed to put the work in as he was the only one to be the only one above 100 yards receiving. Their running game was better as they had multiple 100-yard rushers.

**Defensive Overview:** This defense could not let the other team out of the endzone as there was only one game where they didn't let in more than 20 points per game. You cannot win games like that in high school when your offense cannot score.

#### This year's Schedule

**Overall:** This team for the 2023 season on the offensive side must focus on moving the ball. They struggled to move the ball down the field which is why they could not score. For the defense they need to keep them in the game they let to many points per game. This makes it harder to stay in the game.
