

Ringgold Rams

Last years schedule

Last year's overview: The hard times continued this past year, as they went 0–10 overall this year. They continue to add to the WPIAL's longest losing streak in their conference, with the last win coming back in 2017.

Offense overview: The Ram's offense was unable to produce points as they averaged 4 points a game. They could not average a touchdown a game.

Defense overview: The Ram's defense last year was nothing to write home about. The Rams defense had only one game where 30-plus points a game.

Overall: This Rams team needs to scrap their style of play. They need to find a scheme of football that fits their team. This year for the Rams must be an overhaul year.
